Leggings

Shoofly Leggings

Made from flexible, plastic mesh to allow air circulation, Shoofly Leggings are easy to attach, comfortable to wear, and will not sag due to their unique sewn-in plastic stays. And they're patented! Features: Chemical-free. Will not sag. Easy-to-use Velcro fasteners. Prevents painful bites from flies and other biting insects. Reduces stress and stomping caused by fly bites. Prevents Botflies from laying eggs and causing botfly larvae infestation. Decreases healing time of abrasions and wounds by allowing air flow. Reduces joint irritation, hoof problems, and muscle fatigue caused by continuous stomping. Does not restrict blood flow or range of motion.

Insecticides - Cattle

Eartags

Eartag - Insecticide - Eliminator

To control Horn flies and reduce face flies on beef and dairy cattle. Active ingredients Cypermethrin 6% and Diazinon 10%.

KVS	Pack	Case	Active Ing	Mfg.
465-050	20	10	6% Cypermethrin / 10% Diazinon	Engage

Eartag - Insecticide - Gardstar

Controls pyrethroid-susceptible horn flies, face flies, Gulf Coast Ticks, and Spinose Ear Ticks. Aids in control of stable flies, house flies, and lice. Contains 10% permethrin.

KVS	Pack	Active Ing	Mfg.
363-160	25	10% Permethrin	Y-TEX

Eartag - Insecticide - Optimizer

Optimizer® is an economical organophosphate tag containing 21% diazinon and performs well in areas with horn fly pyrethroid resistance. Optimizer® controls horn flies, Gulf Coast ticks, spinose ear ticks, lice and aids in control of face flies up to 5 months with two tags per head.

KVS	Pack	Active Ing	Mfg.
363-110	20	21% Diazinon	Y-TEX

Insecticides - Cattle

Eartags

Eartag - Insecticide - Protector

Insecticide-impregnated ear tags are used on cattle for the control of face flies and horn flies. The insecticide is transferred onto the backs and flanks through natural grooming behavior as a result of the fat solubility of the insecticide and its ability to migrate through the lanolin in the hair.

KVS	Pack	Case	Active Ing	Mfg.
465-219	20	10	20% Diazinon	Engage

Eartag - Insecticide - Saber

Saber is an insecticide ear tag that is designed to control horn flies and reduce face flies on beef and non-lactating dairy cattle. Provides horn fly and face fly control with only one tag.

KVS	Pack	Case	Active Ing	Mfg.
027-507	20	12	10% Lamda-cyhalothrin	Engage

Tag Remover Knife - Universal

Quick & easy ear tag remover.

Rescue Japanese Beetle Trap

This trap catches the Japanese beetle, a destructive garden pest that infests and destroys over 300 varieties of ornamental plants. Also catches the Oriental beetle, which feeds on roots of turfgrass, nursery stock, greenhouse ornamental crops and fruit. The trap uses floral scents proven to be a natural attractant, along with the beetle's natural sex attractant. The trap uses a scientifically designed method to control the release of these natural floral and sex attractants to lure both male and female beetles to the trap. The convenient plastic cone design prevents the user from having to handle the actual attractants.

Insecticide - Baited Powder

Takes advantage of mineral deposits of diatoms which have been found useful in reducing crawling insect pest populations in and around the home. The patented manufacturing process of this product combines two food-grade additives, one of which attracts the insects while the other is a digestive ingredient. This formulation usually kills crawling insects within 48 hours from internal and external abrasive action. This fine powder is odour free, does not discolour and is not harmful to animals, fish, fowl or food, when used as directed. Product is effective as long as it is present and can be used indoors or outdoors.

White Lake Diatomaceous Earth®

DE = **Diatomaceous Earth** = [dahy-uh-tuh-mey-shuh s] [urth]

Two Types of DE

Natural Grade DE (Non-Calcined) is prepared by drying at a low heat to prevent organic components from being lost. The delicate structural integrity of the diatoms is preserved by this careful process. The naturally occurring amorphous silica remains in its natural state and contains less than 1% crystalline silica.

Filter/Pool Grade DE (Calcined) is treated at a high heat causing the natural amorphous silica in the DE to turn into crystalline silica. Crystalline silica can be dangerous when inhaled or ingested. Calcined products may contain up to 70% crystalline silica.

Natural Grade DE (Non-Calcined)

What is Diatomaceous Earth?

Diatomaceous Earth is a soft, siliceous sedimentary rock containing the fossilized skeletal remains of diatoms. Diatoms are single-celled algae found in oceans and waterways. Diatoms are the most abundant type of phytoplankton. There has been found to be more than twenty-five thousand species of diatoms, none of which have the same shell. Over many years these layers of dead diatoms fossilize and become rich deposits of diatomaceous earth, or diatomite.

White Lake Diatomaceous Earth® is a “natural grade” (uncalcined) D.E. from a freshwater source mined in Oregon USA.

Annihilator™ Polyzone®

Annihilator™ Polyzone® is a broad-spectrum insecticide premise spray that provides outdoor residual control for up to 90 days. This broad-spectrum spray controls crawling, flying and wood-infesting pests for indoor and outdoor use around cattle facilities, horse stables and other areas listed on the label.

Annihilator™ Polyzone® uses technology that binds active ingredient to surface, slowly releases over time and provides residual control that lasts for up to 90 days. It's exclusive formulation protects the active ingredient from weather, wash-off and mechanical abrasion. Longer residual control may result in cost savings by reducing labor and number of applications required. Just mix with water and apply with hand-pressurized or power-operated sprayers.

Hombre Rodenticide

Hombre contains difethialone, a single-feed, 3rd generation anticoagulant. It's the newest and most active ingredient against rats and mice. Its advanced chemistry (high efficacy at low dose) allows Hombre to be formulated at 50% of the concentration of other products in the marketplace. This makes Hombre virtually undetectable. In addition, Hombre is made with whole and ground food-quality grain and has an attractive odor. It's palatability results in optimal acceptance which helps to drastically decimate rat and mice populations. The bait must be consumed to be effective, and rodents will eat HOMBRE for sure. Keep in a cool, dry place.
