Shoofly Leggins

Made from flexible, plastic mesh to allow air circulation, Shoofly Leggins are easy to attach, comfortable to wear, and will not sag due to their unique sewn-in plastic stays. And they're patented! Features: Chemical-free. Will not sag. Easy-to-use Velcro fasteners. Prevents painful bites from flies and other biting insects. Reduces stress and stomping caused by fly bites. Prevents Botflies from laying eggs and causing botfly larvae infestation. Decreases healing time of abrasions and wounds by allowing air flow. Reduces joint irritation, hoof problems, and muscle fatigue caused by continuous stomping. Does not restrict blood flow or range of motion.

CyLence® (1% cyfluthrin)

Elanco™

For effective control of chewing and sucking lice and horn flies on beef and dairy (including lactating) cattle, and effective control of biting lice and keds in sheep.

FAST AND EFFECTIVE TOPICAL ACTION

- Once applied, CyLence® spreads through the treated animal's coat, to kill horn flies, and chewing and sucking lice through contact

CONVENIENT

- Ready to use with no mixing or dilution calculations required
- Withdrawal periods of zero days for milk and one day for meat
- Low dosing volume reduces application time, run-off and number of containers for disposal

FOR BEST RESULTS

- Apply product along the topline from the head to tail
- Help to prevent re-infestation by treating all cattle in the group

DID YOU KNOW?

- Horn flies rest on cattle, feeding on blood 20–30 times per day. They can cause weight loss and reduced milk production and can spread bacteria that cause mastitis and other diseases¹
- Chewing and sucking lice cause irritation, leading to scratching, skin damage, hair loss and even anemia²

Less product

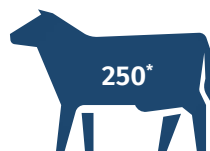

More cattle and sheep treated

Mr. Sticky Fly Trapping System

Non-Polluting non-toxic Sticky Roll is a reel-to-reel system of sticky tape that really catches flies! When flies first hatch after feeding or when the weather cools they tend to congregate overhead where they are caught on the roll. Once entrapped they produce stress chemicals which are irresistible attractants to other flies. Eventually the tape is completely black with trapped flies.

Sticky Roll is a safe and effective system that is easy to install for use in areas such as dairy barns horse stables animal premises of all kinds veterinary areas kennels zoos food processing areas and anywhere flies are a problem. USDA testing shows that Sticky Roll captured 92% of available flies an astonishing performance considering Sticky Roll is completely non-toxic and non-polluting.

Deluxe Hardware Kit sold separately. This hardware kit is designed for use with Mr. Sticky's Deluxe Sticky Roll fly tape. Complete kits with tape are also available and refills of tape are sold separately.

Rescue Japanese Beetle Trap

This trap catches the Japanese beetle, a destructive garden pest that infests and destroys over 300 varieties of ornamental plants. Also catches the Oriental beetle, which feeds on roots of turfgrass, nursery stock, greenhouse ornamental crops and fruit. The trap uses floral scents proven to be a natural attractant, along with the beetle's natural sex attractant. The trap uses a scientifically designed method to control the release of these natural floral and sex attractants to lure both male and female beetles to the trap. The convenient plastic cone design prevents the user from having to handle the actual attractants.

KVS	Mfg.
786-040	Rescue

Rescue Wasp, Hornet, & Yellowjacket Trap

The W·H·Y Trap has two chambers and three attractants to catch 19 different species of insects. The top chamber is baited with two attractants -- one of which is a solid contained in a vial, and the other a liquid mixed with water. The bottom chamber is baited with a liquid attractant poured onto a cotton pad. Wasps, hornets and yellowjackets have two ways to enter: either through the top cap, or through the holes in the bottom cap.

Insecticide - Baited Powder

Takes advantage of mineral deposits of diatoms which have been found useful in reducing crawling insect pest populations in and around the home. The patented manufacturing process of this product combines two food-grade additives, one of which attracts the insects while the other is a digestive ingredient. This formulation usually kills crawling insects within 48 hours from internal and external abrasive action. This fine powder is odour free, does not discolour and is not harmful to animals, fish, fowl or food, when used as directed. Product is effective as long as it is present and can be used indoors or outdoors.

Spider Traps

Rescue Spider Trap

Rescue spider trap is disposable, recyclable and ready-to-use. It catches a variety of biting and poisonous spiders common in the home, including: black widow spiders, brown recluse spiders, sac spiders, hobo spiders, jumping spiders and wolf spiders. With four entrances and hundreds of glue dots, spiders can travel to the interior of the trap instead of merely congregating on the edges, allowing many more to be caught. With two sides of glue, a quick flip of the trap keeps you in the spider-catching business! The attractive, yet inconspicuous thin shape allows placement in narrow spaces. RESCUE!'s goal is to design, manufacture and market the safest, most effective pest control solutions available.

Hombre Rodenticide

Hombre contains difethialone, a single-feed, 3rd generation anticoagulant. It's the newest and most active ingredient against rats and mice. Its advanced chemistry (high efficacy at low dose) allows Hombre to be formulated at 50% of the concentration of other products in the marketplace. This makes Hombre virtually undetectable. In addition, Hombre is made with whole and ground food-quality grain and has an attractive odor. It's palatability results in optimal acceptance which helps to drastically decimate rat and mice populations. The bait must be consumed to be effective, and rodents will eat HOMBRE for sure. Keep in a cool, dry place.

Better Baits, Better Results

Ramik®

When rats and mice invade your spaces they can cause damage, contaminate food and feed, and possibly transmit diseases. Ramik rodenticides and bait stations provide you with options to easily get control of your rodent problem and continue treatment to prevent problems in the future.

Ramik is a 1st generation anticoagulant: Diphacinone

- Death may occur within 4–5 days after a lethal dose is consumed
- Formulated with food quality grains

Ramik Blocks, Bars, and Refillable Bait Stations

All-weather bar baits are manufactured utilizing an extrusion process where all the ingredients are fully blended, bonded, and then shaped into weather resistant bait bars. Formulated with wax, these baits are moisture and mold resistant and can be used in wet or dry areas.
