

Buckets Accessories

Bucket Handle Grip

Carry your buckets comfortably and still hang them up! Ergonomic grips fit on standard v-handle buckets to reduce hand fatigue while still allowing bucket to be hung. Patented easy snap-on and snap-off design can be used with Little Giant plastic and rubber v-handle buckets and most wall brackets. Made of durable black polypropylene.

Bottle - Calf Nipples

Merrick's Super-Calf Nipples feature the first advance in calf nursing nipple design in many years. Incorporated into the nipple design is a patented air release valve, which prevents leakage and yet allows air to be released into the bottle as the calf is nursing. This ensures the proper flow of milk through the nipple to the nursing calf. This valve is protected with extra "bumpers" for even longer wear. In addition, the surface of the Super-Calf Nipple has been specially treated to promote ease of use.

Nipples - Peach Teat - Black

The Peach Teat allows no more fluid to pass through it than a cow's udder naturally would, allowing the calf to suckle more intensely than conventional technology. This stimulates the flow of saliva and improves the PH-level in the stomach and leads to better digestion. These threaded teats are compatible with any standard or home-made feeder with a 20mm (3/4 inch) hole.

Feeders & Waterers

Feeders - Plastic

Feeder - Plastic - Better Bucket

This patented, ergonomically designed feeding bucket is excellent for horses, cattle, and other livestock. Angular design better accommodates animal's facial structure, allowing a more natural eating posture and reducing animal behavioral problems associated with feeding. Tapered sides funnel feed toward the back of the bucket, making feed and grain more accessible without the animal having to strain in an awkward position. The Flat-Back provides stability against a wall or fence. Mounts on a flat wall with either a traditional wall bracket or snap hook (not included). Durable, impact resistant, high-density polyethylene construction with smooth, finished edges.

Feeder - Plastic - Hook Over - Goat

A great little feeder for goats, sheep, alpacas, and llamas. Ideal in creep pens or when feeding multiple animals together. Unique design helps reduce feed waste while promoting animal safety and improved health. Galvanized steel grid forms six feeding slots; helps keep boss animals from pushing others out while eating. The grid also adds strength to the feeder, and its reinforced hooks provide extra support on the ends. Made of tough, impact-resistant, high-density polyethylene which protects against warpage, stress cracks, and UV damage.

Slow Feeder Saver

Our Slow Feeder Saver Jr. is designed to give Equine the healthiest and most natural eating experience possible regardless of them being stalled or stabled. The small grate holes prevent horses from wasting feed by consuming it to quickly or spreading it out on the ground by forcing them to take small bites. This also has the added benefit of keeping them occupied longer reducing boredom, which can lead to cribbing and poor temperament. Slow Feeding is proven to improve the digestive process, which leads to better overall Equine health.
